

YAZAN SHAMOUN

Mechanical BIM Engineer | HVAC & MEP Design Engineer

yazanshamoun33@gmail.com | +962 78 827 5481 | Amman, Jordan | linkedin.com/in/eng-yazan-shamoun

SUMMARY

Mechanical Design & BIM Engineer with experience in HVAC, MEP design, and BIM coordination across large-scale data center, commercial, and infrastructure projects in Saudi Arabia, the UAE, and Kuwait. Experienced in multidisciplinary coordination, LOD 350–400 deliverables, shop drawings, and as-built documentation for major projects including STC, Qiddiya, and PNU. Proficient in Revit MEP, AutoCAD, Civil 3D, and Navisworks, with practical knowledge of HVAC design and thermal load calculations in accordance with ASHRAE standards.

PROFESSIONAL EXPERIENCE

Mechanical Design Engineer – HVAC & MEP

01/2026 – Present

Fluids Control Contracting — Amman, Jordan

- Qiddiya District Cooling Plant (DCP) & Pipeline – SAR 30M: Coordinated the BIM 3D model, addressed RFI comments, and resolved multidisciplinary coordination issues across civil, structural, and mechanical systems.
- Nahda DC2 (Nournet – Data Center): Coordinated with site contractors to ensure all MEP work was executed according to specifications and within the required tolerances for the data center.
- STC Dammam 371 (SAR 37M) & Princess Nourah University – PNU (SAR 45M): Produced 150+ MEP shop drawings and as-built documentation supporting facility handover and authority submissions.
- Rawabi (RDC104) & Jandriya (RDC103): Verified as-built drawings against project specifications and completed technical documentation supporting project close-out activities.
- Temporary Document Control Assignment: Covered a colleague's absence, managing submission logs, transmittals, revision control, and document status coordination.

Mechanical Engineer – MEP

08/2025 – 01/2026

Hindaza BIM Engineers — Amman, Jordan

- Diriyah Project (Museum – Saudi Arabia): Supported coordination of over 10,000 multidisciplinary clashes using Navisworks Manage 2024, improving model integration and minimizing design conflicts.
- Shopping Mall (Dubai – SurfBase Section): Designed and coordinated HVAC & Firefighting layouts remotely in collaboration with the Dubai design team.
- Kuwait International Airport (LOD 400): Modeled and coordinated complex mechanical piping networks (potable water, return water, vacuum, and blue water) for the aircraft service house, ensuring precise integration for operational servicing.
- Tuwaiq Project (Jubail – FOC Design): Developed LOD 350 shop drawings and coordinated BIM workflows in accordance with USACE standards and project requirements.

EDUCATION

B.Sc. in Mechanical Engineering – Thermal Power & Energy

2020 – 2025

Mutah University — Karak, Jordan

TECHNICAL SKILLS

BIM & Mechanical Design Software: Revit 2024, Navisworks Manage 2024, Civil 3D, AutoCAD 2024, Dynamo, Duct Sizer, Pipe Sizer, HAP

Mechanical Systems: HVAC Design, Chilled Water Systems, District Cooling, Plumbing Systems, Firefighting Systems, Medical Waste Systems

Additional Software: Microsoft Excel, Microsoft Word, Foxit PDF Editor

BIM Processes: Clash Detection & Resolution, Multidisciplinary BIM Coordination, MEP Coordination, LOD 350/400 Modeling

Engineering & Standards: Thermal Load Calculation (ASHRAE), Shop Drawings, As-built Documentation, NFPA, IPC, IMC, USACE Standards

Engineering Skills: Technical Coordination, Design Documentation, RFI Resolution

SELECTED PROJECTS

- HVAC Load Calculation Project: Performed heating and cooling load calculations for a residential building in accordance with ASHRAE standards.
- Graduation Project – Smart Building System: Engineered an ESP32/Arduino-based building automation system focused on HVAC monitoring, energy efficiency, and safety.

CERTIFICATIONS & COURSES

- MEP Diploma – HVAC, Plumbing, Firefighting (140 Hours), 2025 — Prime Academy
- Revit MEP Training (30 Hours) — Jordan Engineers Association, Autodesk-Certified Center (Autodesk Certificate)
- Dynamo for MEP Training (40 Hours) — Kayan Academy, Autodesk-Certified Center (Autodesk Certificate)
- Civil 3D Training (40 Hours) — BIM & Engineering Academy, Autodesk-Certified Center (Autodesk Certificate)
- English Language Course – British Council

ADDITIONAL EXPERIENCE

Intern – Medical Waste Systems

Madina International Trading Company — Amman, Jordan

- Completed university field training focused on medical waste treatment technologies and healthcare ventilation solutions.
